Local Network Security Company Offers Educational Forum on Security and  
Expanding an Infrastructure Wirelessly

Stamford, CT, March 8, 2005 – As part of an aggressive marketing plan, Hi-Link Computer Corporation in conjunction with Cisco Systems, is conducting a forum on securing a company's network and expanding its infrastructure wirelessly.

Two prestigious experts in their field will be presenters at this forum. One presenter is a Cisco security expert who specializes in hacking. He will discuss all the vulnerabilities and threats that exist today and how to best protect us.

Some of the more popular tactics include: phishing scams, identity theft, viruses, Trojans, and wireless network hacking devices made from everyday household items such as a potato chip canister.

The second presenter is a Hi-Link engineer who has over eight years of experience working with Cisco products and numerous industry certifications. He will discuss the ever-growing wireless network. Wireless networks are expanding rapidly, be it at the local coffee shop, fast food restaurant, or local business. This technology is extremely convenient and allows great productivity because it allows an end user to access the Internet and e-mail without having to use a

cable to connect to a network. However this technology does pose a great security threat. This forum will discuss what companies are doing and need to do to create a secure wireless network. This section will focus on real world examples and experiences and will be completely open to questions and dialogue.

The forum will be held on April 7<sup>th</sup> 2005 at Cisco Systems 383 Main St. 7<sup>th</sup> Floor, Norwalk, CT 06851 from 8:30 a.m. – 12:00 noon. People may register for this free informative forum by e-mailing [HYPERLINK "mailto:info@hi-link.com"](mailto:info@hi-link.com)

#### Company Overview

Hi-Link Computer Corp. is an Information Technology solutions provider that specializes in helping its clients build a network infrastructure to make their businesses more efficient. Hi-Link has been servicing the Tri-State area with its unique customer-focused solutions since 1990.

Hi-Link provides three primary solutions: Network Security, Wireless Networking, and IP Communications. Within each one of these areas of expertise Hi-Link offers numerous focal points: Remote access (including VPN and SSL), two-factor authentication, anti-virus, anti-SPAM, IDS/IPS, endpoint security, backup/storage solutions, content filtering, security assessments, wireless site surveys, IP phone design, and complete installations.

Hi-Link is backed by industry certifications and partnerships to achieve all of these solutions. A few of its more prestigious certifications from Cisco include: Security, Routing and Switching, Wireless, and IP Communications. Hi-Link also holds numerous certifications from: Microsoft, Hewlett Packard, Citrix, and Veritas; as well as maintaining all of the necessary qualifications that are required to be partners with companies such as: Symantec, RSA, APC, and Barracuda.
