Local Network Security Company Offers Educational Webinar on Network Security Threats and The Need for More than a Firewall

Stamford, CT, April 12, 2005 – As part of an aggressive marketing plan, Hi-Link Computer Corporation in conjunction with Symantec, is conducting a webinar on securing a company's network and protecting its data and intellectual property from the threats of a network attack. Two prestigious experts in their field will be presenters at this webinar.

One presenter is a Symantec Senior Systems Engineer who specializes in security. She will discuss all the vulnerabilities and threats that exist today and how to best protect us. The second presenter is an engineer from Hi-Link Computer Corp. who will discuss the need for a security plan and how to implement this plan.

The threat to a companies network is real; sixty new computer viruses are identified each week, blended threats such as blaster can circle the world in less than three hours. The best way to manage these outbreaks is to prevent them from occurring in the first place. The Symantec Gateway Security series and Hi-Link's team of security experts enables a company to proactively protect their network, by repelling threats before information and systems are put at risk. This

webinar is an excellent educational opportunity for any company concerned about their network's security and it will feature real world examples and experiences and will be completely open to questions and dialogue.

The webinar will be held online on April 28<sup>th</sup> 2005 from 10:00 a.m. – 11:30 a.m.

### Company Overview

Hi-Link Computer Corp. is an Information Technology solutions provider that specializes in helping its clients build a network infrastructure to make their businesses more efficient. Hi-Link has been servicing the Tri-State area with its unique customer-focused solutions since 1990.

Hi-Link provides three primary solutions: Network Security, Wireless Networking, and IP Communications. Within each one of these areas of expertise Hi-Link offers numerous focal points: Remote access (including VPN and SSL), two-factor authentication, anti-virus, anti-SPAM, IDS/IPS, endpoint security, backup/storage solutions, content filtering, security assessments, wireless site surveys, IP phone design, and complete installations.

Hi-Link is backed by industry certifications and partnerships to achieve all of these solutions. A few of its more prestigious certifications from Cisco include: Security, Routing and Switching, Wireless, and IP Communications. Hi-Link also holds numerous certifications from: Microsoft, Hewlett Packard, Citrix, and Veritas; as well as maintaining all of the necessary qualifications that are required to be partners with companies such as: Symantec, RSA, APC, and Barracuda.
